South Africans face all kinds of challenges on a daily basis, as our natural resources become increasingly limited. At the same time, we are experiencing economic and ecological pressures and serious health problems are demanding the lives of many of our people on a daily basis. And this why the Lifewise Eco-Loo came into being ...

Developing a sanitary system that saves water, promotes hygiene and is also environmentally friendly required a lot of time, effort and initiative, but this is how the Lifewise Eco-Loo came to be. So effective is it, that we can assure you there is not yet such a unique and revolutionary system on the market. Which means there is also no better sanitary investment on the market, as the system is guaranteed to provide optimal service for at least the following 10 YEARS!

What is it? Basically, the Lifewise Eco-Loo is a sink on top of a standard flush toilet.

Why? Because it enables you to save space and water, in a very practical and easy way, as the design allows the water to enter the toilet automatically, once you have used the sink.

How does it help you? In a variety of practical ways here are just a few of the incredible benefits of the Lifewise Eco-Loo:

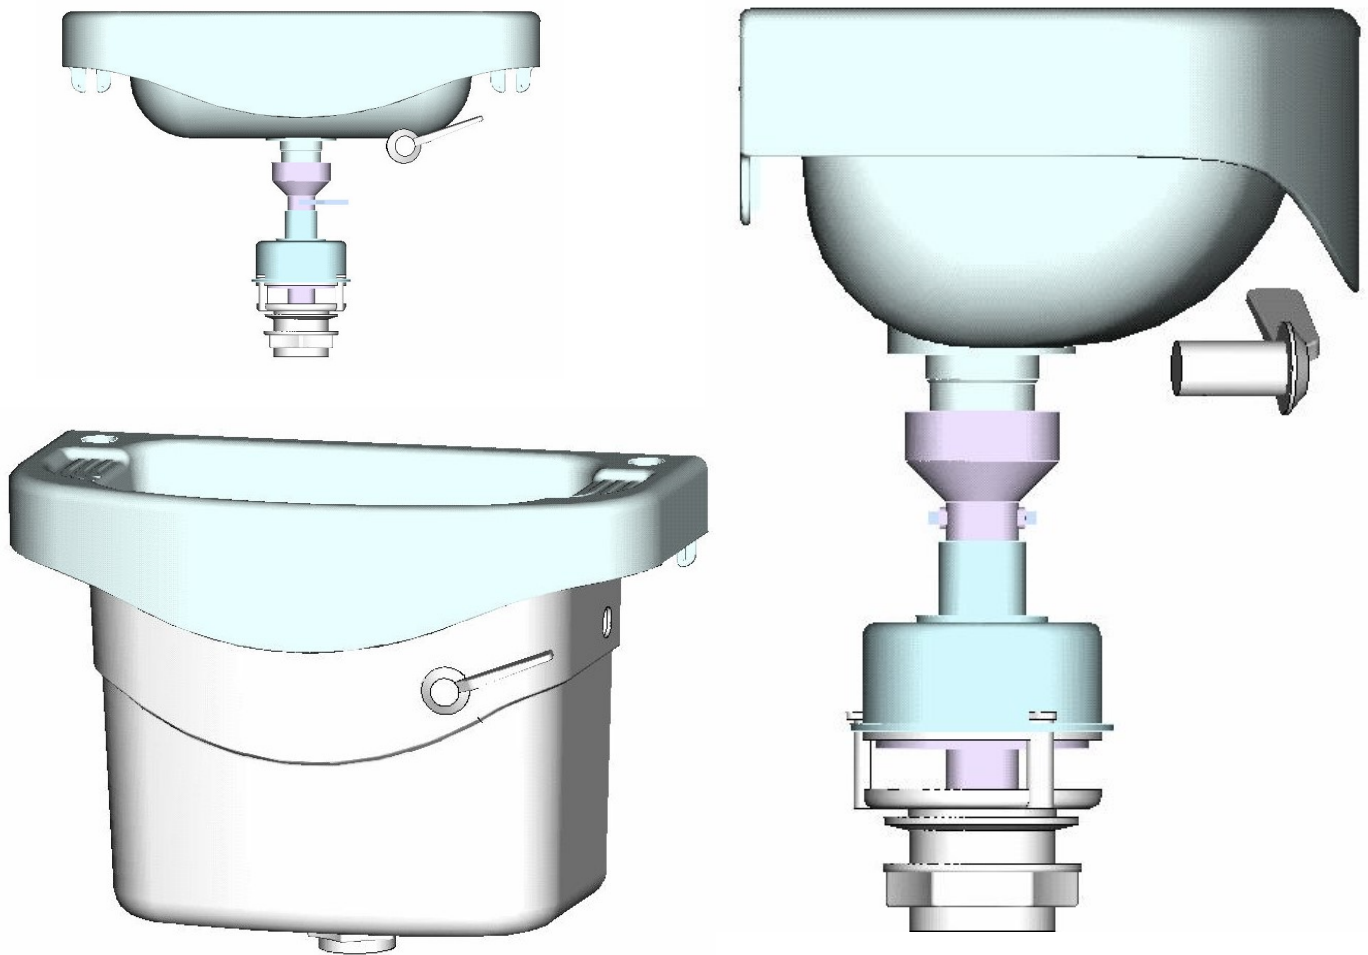

- You can literally help save millions of gallons of water every day, through these ingenious system, because for every person who uses the Lifewise Eco-Loo, save a minimum of 56 liters of water every day. In an average household of 4 people it saves 224 liters of water every day, and in a village of 50,000 people this means a saving of 2.8 million liters of water EVERY DAY!
- It promotes hygiene in the home as you are forced to wash your hands after use, to ensure the urine is flushed away. To top it all off, the soap you use to hands wash your hands act as an extra detergent in the toilet bowl.
- You will save up to 33% floor space by combining the basin and toilet units and the installation of the combination can save up to 80% on expenses parts, as only one water connection can be used for both basin and toilet.

The Lifewise Eco-Loo complies with all SABS regulations and requirements and can fit most standard toilets. Which makes it absolutely ideal for every conceivable place of public amenities such as in schools, churches, centers, office blocks, factories, for private use in low-cost housing projects, private homes, farms, apartment blocks, etc.

HOW THE LIFEWISE ECO-LOO WORK

The water flows from the sink, through a funnel, directly into the toilet pan. The water NEVER flows in the cistern and there is at all times 6 liters of water available to flush the toilet with, would it be necessary.

INSTALLING THE LIFEWISE ECO-LOO

PARTS LIST

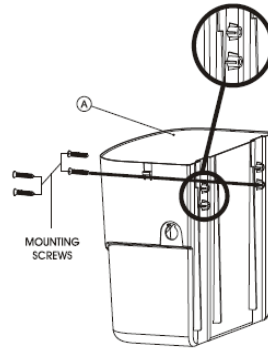

- A - CISTERN
- B - FLUSH VALVE ASSEMBLY
- C - VALVE SEAL
- D - LOCK NUT
- E - LEVER HANDLE
- F - HANDLE BUSH
- G - HANDLE SEAL
- H - INLET FIXING NUT
- I - LIFTING ARM
- J - FLOAT ASSEMBLY
- K - INLET SEAL
- L - T-PIECE
- M - BASIN

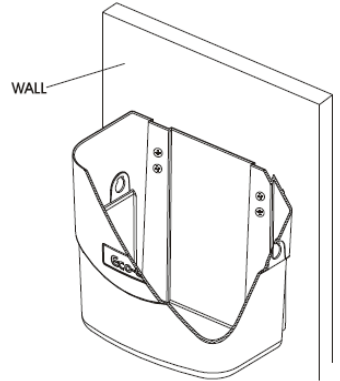

Congratulations on selecting the Lifewise Eco-Loo - the best sanitary option for yourself and your environment.

The top six unique benefits of the Lifewise ecoloo

South Africa is indeed facing a huge water shortage and you can still start today helping to save millions of litres of water! If you save a minimum of 56 liters of water per person per day with the Lifewise Eco-Loo, you can imagine how many million of liters can be saved in one town or city ?!

The Lifewise Eco-Loo requires only one water connection for both the basin and toilet, which means you can save up to 80% on installation costs. So you get 2-in-1 efficiency for less than half the cost or effort.

You also save up to 33% on floor space, as the basin and toilet units are combined making it ideal for small rooms and guest toilets.

The flush mechanism will also last much longer, as its operation decreases with about 75%.

The system is sealed and has a valve key lock mechanism, which makes it extra secure and unique.

And you can enjoy the fantastic benefit of more hygiene in the home as you wash your hands after each use of the toilet, that not only promotes personal hygiene, but the soap you use also serves as an extra detergent in the bowl of the toilet.

**In every field, you undoubtedly enjoy value,
savings and peace of mind!**

WHO WILL BENEFIT FROM THE LIFEWISE ECO-LOO?

BUILDERS

Especially builders working on low-cost housing projects, where savings on installation costs is a priority, or where space may be limited or seeks only for better quality that will last longer.

HOUSEOWNERS

Anyone currently living in a home that will benefit from the incredible water and cost savings.

UPGRADES

Anyone who would like to upgrade their sanitary facilities, homemakers who want refurbishment and inventive people who are always on the lookout for more efficient ways of living.

ARCHITECTS

Because of the huge space and installation savings, not to mention the endless possibilities, from public facilities to shopping malls to office blocks, to homes, it's definitely a smarter way to plan for a better life anywhere!

SPACE SAVERS

Rising costs of facilities, resources and property make the Lifewise Eco-Loo the perfect solution for any conceivable space and you can also improve your quality of life!

FARMERS & ENVIRONMENTALLY FRIENDLY CUSTOMERS

"Our country is located in an area with severe water scarcity and it does not matter how many dams we build we can not generate the water to fill them. We must all be water-wise and protect our scarce water resources. " Minister of Water Affairs & Forestry

Every person in this country has to start saving water TODAY, because the longer we wait, the sooner our water resources will be depleted. With the Lifewise Eco-Loo you can **start saving immediately!**
