

How much is the hardware (only) cost?

USD40 at the very least for local sample. If made available through different financing mechanisms like PPP, or humanitarian supplies, cost will vary. Dual tippy tap is also a symbol of environmental sustainability. For example the following components are from re-use driven by the call to deal with plastic waste: used Jerri cans, straws and local area network (LAN) cables waste. These can be replaced by what is contextually applicable (plastic waste). Its installation can be secured on a flat surface with stones or concrete blocks or permanently fixed on the ground or a basin with soil and hand packed pebbles to act as soak-away. Its securing ideas are relatively adaptable.
